A charming and attractive puzzle game with some terrific world environments. The characters are appealing, with clever details that bring them to life, and the levels are richly detailed. A nice surprise for a game I hadn't heard of until the day after it came out. Kids and casual gamers will love this.. Hamilton's Great Adventure. Nothing special, and the fact that it only runs on Windows Vista or Windows 7 is pretty bad. On sale or in a bundle maybe go for it, but otherwise I don't recommend it.. I don't think I got far enough to give a proper review, but first impressions... incredibly boring and thoughtless.. Hamilton's Great Adventure is a very good puzzle/adventure game, in which you have to find the right path in order to reach the exit of each level. It might look simple at first, but as the game progresses, the complexity increases, with new enemies, traps, and more complex layouts. Getting all the coins, while being an optional challenge, is well worth it to put your skills to the test.

As I mentioned in the opening paragraph, the gameplay consists on finding the path to the exit. Of course, you must first get the key (or keys) needed to open the exit door (and other doors which might be in your way). You play as Hamilton (the explorer) and Sasha (the bird). While Hamilton must grab the keys and reach the exit, Sasha can help you by distracting enemies, or using certain switches in order to open some doors or activate elevators. As you progress through each chapter, you'll also get special items that Hamilton can use. The level design is very good; while the earlier levels are easy enough for you to learn the game, the latter levels can become very challenging, especially if you're trying to get gold on them; not to mention the bonus levels available in each chapter.

When it comes to story, I must say I found it interesting. It's nothing out of this world, but rather what you'd expect from a movie or book similar to Indiana Jones: an explorer, in this case Hamilton, goes after a valuable archaeological object across the world, and there's other people who are also looking for it. I liked the Lovecraftian references in the story, I found it to be funny given the game's "innocent" look. Don't expect existential horror, however, they're mostly funny references for those familiar with Lovecraft's work.

As for the soundtrack, well, there's not much to say. Other than the opening theme, which gives that adventure vibe to the game, most of the soundtrack consists of background music which isn't very catchy. Not that it's something bad, as I think that the "minimal" soundtrack helps you stay focused on solving the puzzles.

Well, I think that's enough for this game. To conclude, I'd say I recommend it, and it's a good puzzle game for people across all ages.. Small puzzle game about timing and planning. Fun and not that complex, but a couple of really frustrating levels.. A wonderful puzzle game worth every hour spent. It has unique and challenging levels where solving them is a reward in itself, making you feel like a boss when EXCELSIOR (collecting everything in a level) finally pops out!

Its fun to play and redo because it is very easy to understand and the controls are very tight and fluid. This is a game that deserves its spot in the puzzle genre.. A lot of fun. Simple puzzles and a fun art style combine to entertain for hours. I use a Razer brand "Onza" Xbox-type controller to play this game.. The adventure isnt that great. Crashes all the time, mostly it takes 4 tries to finish a level, it does not last for 1 minute...

A fun puzzle game with an Indiana Jones-style storyline and cute cast of characters. The gameplay reminds me of the old Crash Bandicoot games, running over platforms, collecting gems, and trying to get to the end of the level without dying. An excellent game for the \$1.00 I paid for it with a 90% off coupon.. Very fun platformer/puzzler. About 40 levels with challenge, but not total frustration. Check out them demo for a good taste.. Very samey. Frogger clone.. This is a hard little puzzle game xD. If you really like puzzle games A LOT, and are willing to spend lots of time on them, then this game is for you!. 6/10 - Maybe, just maybe, there is someone who ENJOYED this game. But not me.
